## RECENT PROJECTS

### PlanetSearch - [Github Repository](#)

A collaboration between myself and three other individuals on a mobile-first application aimed at combining geolocation, weather forecasting, and astronomical data for those interested in the outdoors and astronomy while utilizing multiple third party API's.

### Weather Dashboard - [Github Repository](#)

A mobile-first application which utilizes multiple datasets from the [Open Weather API](#) to give users the ability to search any city in the world and get not only the current weather, but a 5 day forecast with highlights of weather conditions for those days, all while storing search history locally for re-use.

### Scheduler App - [Github Repository](#)

A scheduling app for daily planning. Designed to be mobile first with an emphasis on user experience and simplicity. Utilizes local storage for later use with options to update your day as you see fit, when you see fit.

# Andrew Moses

## Trainer, Team Leader

Full Stack Web Developer and experienced Team Lead with a demonstrated history of success in leadership within the financial services and healthcare industries, with a continuous drive to learn, take on challenges, and refine my skills.

## EXPERIENCE

### Rock Central/Quicken Loans

2019 to Present

#### Trainer, Team Leader

Leads classes of incoming bankers through 4 weeks of intensive training on all areas of knowledge related to mortgage banking. Mentors new trainers as they develop their skills, and coaches bankers once they are licensed and helping clients.

### Donor Network of Arizona

2011 to 2019

#### Lead Recovery Coordinator

Directed a team of 3-5 individuals efficiently in highly adaptive and challenging situations with heavy time restrictions. Trained new and existing staff in all clinical positions, medical record and suitability review via EMR, and national certification.
